## Idaho Rangeland Assessment Career Development Event 2020 Scorecards

$\qquad$

## Part 1A - Stocking Rate and Management Recommendations (90 points)

The scenario and map will be provided. You must show your work to receive full credit.
Space for Calculations:

Supply of usable forage $=$ $\qquad$ pounds AND

AUMs
30 pts

Forage demand $=$ $\qquad$ pounds

AND $\qquad$ AUMs 30 pts

Determine if the stocking rate is appropriate for the site. You must show your work in order to receive full credit. (Check appropriate box)Keep Rate the Same

Choose the correct management activities that apply to improve this site (Select "Yes" for all that apply and select "No" for all that do not; 2pts each)

## Yes | No

$\square$ Defer from spring grazing
$\square$ Rest from grazing for a growing seasonInstall a rotation grazing system
$\square$ Add or revise fencing
$\square$ Develop additional water sites

Yes | No
Control brush, trees and/or noxious weedsSeed or interseed with adapted speciesReduce human recreation activities on site
$\square$ Manage for endangered species $\square$ Change salt location
$\qquad$

## Part 1B - Current Rangeland Issue (40 pts)

Range management is a dynamic science and constantly evolving. Answer the 5 multiple choice questions about the current rangeland issues that was identified by the host state ( 20 points, 4 points each).
1.
2.
3.
4.
5.

Complete the scenario addressing the current rangeland issue. This may include fencing installment, forage planting, water improvement, etc. This will require a calculation for total cost of implementation of the plan based on inputs and requirements. You must show your work to receive full credit ( 20 pts; partial credit may be given).

Show Calculations:

Total Cost of Implementing Project:
$\qquad$

Part 2 - Plant Identification (150 points). Identify the plants from a list of 55 plants.

|  |  |  | Growth Form |  |  |  |  |  | Origin |  | Forage Value |  |  |  | Toxic |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Life <br> Span | For Grazers |  | For Browsers |  |  |  |  |
| Plant Name (write name from list below) |  |  |  |  |  | G | F | W |  | A | P | N | 1 | D | U | D | U | T |
| 1. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 2. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 3. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 4. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

## Part 3 - Site Description (85 points)

Precipitation Zone (Select one)

| $\square$ Desert | $\square$ | Mountain |
| :--- | :--- | :--- |
| $\square$ Semi-Desert | $\square$ | High Mountain |
| $\square$ Upland | $\square$ | Alpine |

Soil Depth \& Rockiness (Select one)
$\square$ Shallow
$\square$ Deep Gravelly
$\square$ Deep
$\square$ Deep Stony

Soil Texture (Select one)

| $\square$ Sand | $\square$ | Silty Clay Loam |
| :--- | :--- | :--- |
| $\square$ Loamy Sand | $\square$ | Clay Loam |
| $\square$ Sandy Loam | $\square$ | Sandy Clay |
| $\square$ Silt Loam | $\square$ | Silty Clay |
| $\square$ Loam | $\square$ Clay |  |
| $\square$ Sandy Clay Loam |  |  |

Slope - Clinometers will be provided on site (Select one) - NOTE: Measure the slope delineated between the flags.
$\square$ 0-5\% (nearly level)
$\square \quad 16-20 \%$ (moderately steep)
$\square \quad 6-10 \%$ (slight slope)
$\square$ 21-45\% (steep)
$\square$ 11-15\% (moderate slope)
$\square>45 \%$ (very steep)

Aspect - Compasses will be provided on site (Select one)

| $\square$ North $\left(338^{\circ}-22^{\circ}\right)$ | $\square$ North East $\left(23^{\circ}-67^{\circ}\right)$ |
| :--- | :--- | :--- |
| $\square$ North West $\left(293^{\circ}-337^{\circ}\right)$ | $\square$ East $\left(68^{\circ}-112^{\circ}\right)$ |
| $\square$ West $\left(248^{\circ}-292^{\circ}\right)$ | $\square$ South East $\left(113^{\circ}-157^{\circ}\right)$ |
| $\square$ South West $\left(203^{\circ}-247^{\circ}\right)$ | $\square$ South $\left(158^{\circ}-202^{\circ}\right)$ |

Biomass Estimate - Based on averaging the dry weight in 3 designated $4.8 \mathrm{ft}^{2}$ plot.
(20 pts for each correct answer for herbaceous and shrubs; or 10 pts if category nearest to correct answer is selected).

Herbaceous (select one):
$\square$ 0-400 pounds/acre
$\square$ 400-800 pounds/acre
$\square$ 800-1200 pounds/acre
$\square$ 1200-1600 pounds/acre
$\square>1600$ pounds/acre

Current Season Shrubs (select one):
$\square$ 0-400 pounds/acre
$\square$ 400-800 pounds/acre
$\square$ 800-1200 pounds/acre
$\square$ 1200-1600 pounds/acre
$\square>1600$ pounds/acre

## Part 4 - Rangeland Assessment (95 points)

4A. Similarity to Desired State (40 points)
Calculate the similarity between observed and desired composition based the expected annual biomass production on a dry weight basis. "Observed Composition" will be estimated in the field (in Plots 1, 2, and 3 ) and "Desired Composition" will be provided. The evaluation area will consist of 3 marked, square plots ( 50 by 50 cm ) within a larger marked area.

| Plant Class | Plot 1 Proportion of Biomass (\%) | Plot 2 Proportion of Biomass (\%) | Plot 3 Proportion of Biomass (\%) | Average Observed Composition (\%) | $\begin{aligned} & \text { 은 } \\ & \stackrel{0}{6} \end{aligned}$ | Desired Composition (Provided at Site) (\%) | \% Counted Toward Similarity |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Perennial Grass |  |  |  |  | $\begin{gathered} \pm 5 \% \\ \pm 50 \% \end{gathered}$ |  |  |
| Annual Grass |  |  |  |  | $\begin{gathered} \pm 5 \% \\ \pm 50 \% \end{gathered}$ |  |  |
| Forbs (annual and perennial) |  |  |  |  | $\begin{aligned} & \pm 5 \% \\ & \pm 10 \% \end{aligned}$ |  |  |
| Shrubs |  |  |  |  | $\begin{array}{r}  \pm 5 \% \\ \pm 10 \% \end{array}$ |  |  |
|  | 100\% | 100\% | 100\% | Calculated Similarity |  |  |  |

Average Observed Composition \% (28 pts)| 7 pts for each plant class if answer is within $\pm 5 \% .3$ pts if answer is within $\pm 10 \%=$ $\qquad$ pts
\% Counted Toward Similarity (12 pts) | 3 pts for each plant class with correct composition category counted toward similarity $=$ $\qquad$ pts

4B. Browse Age Diversity (40 pts total)- Determine the diversity of age classes for browse plants present in a belt transect delineated on the site. Examine flagged plants to determine age structure. Calculate the proportion of shrubs by age class for shrubs based on your observations (Complete table and make calculations).

| Age Classes of Shrubs | Tally of Plants <br> (field count) | Total Tally <br> Count | Relative Age Class <br> Distribution (\%) | Relative |
| :--- | :---: | :---: | :---: | :---: |
| Young <br> (<5\% dead stems) |  |  |  | $\pm 5 \%$ |
| Mature <br> ( $>50 \%$ live stems, $5-50 \%$ dead stems) |  |  |  | $\pm 5 \%$ |
| Aged <br> (50\% live stems and > 50\% dead stems) |  |  |  | $\pm 5 \%$ |
| Dead <br> (No live stems; all stems appear dead) |  |  |  | $\pm 5 \%$ |
| Total |  |  |  |  |

10 pts for each \% relative age distribution within $\pm 5 \%=$
4C. Browse and Ecosystem Change. (5 pts total) Based on your data for browse age diversity, which of the following statements best describes the ecosystem dynamics:

- The site is in a state of renewal or invasion with mostly young plants.
$\square \quad$ The site is apparently stable with abundant young plants and a nearly equal mix of age classes.
$\square \quad$ The site is apparently transition to a site with less shrubs as most woody plants are aged or dead.
$\qquad$

## Part 5 -Rangeland Ecosystem Measurements (70 pts)

5A. Landscape Appearance Utilization Estimate (Based on observations recorded in 20-25 flagged sections on a transect; (35 pts)

|  | Interval |  |  | Midpoint |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Class | Midpoint | "Hits" | Count | ( Count | Herbaceous Utilization Classes |
| Intervals | (M) | Tally | (C) | $(\mathrm{M} \times \mathrm{C})$ | Based on Landscape Appearance |

| 0-5 \% | 2.5 |  |  | Desirable forage plants show no evidence of grazing or negligible use. |
| :---: | :---: | :---: | :---: | :---: |
| 6-20\% | 13 |  |  | Desirable forage plants have the appearance of very light grazing. The herbaceous forage plants may be topped or slightly used. Current seedstalks and young plants are little disturbed. |
| 21-40\% | 30 |  |  | Desirable forage plants may be topped, skimmed, or grazed in patches. The low value herbaceous plants are ungrazed. Most young plants are undamaged. |
| 41-60\% | 50 |  |  | Half of the available desirable forage plants appear to have been utilized. No more than $10 \%$ of the undesirable herbaceous forage plants are utilized. |
| 61-80\% | 70 |  |  | More than half of the available desirable forage plants are almost completely utilized. More than $10 \%$ of the undesirable herbaceous forage plants have been utilized. |
| 81-94\% | 88 |  |  | The rangeland has a mown appearance. Desirable forage plants appear to be heavily utilized and there is no evidence of reproduction or current seedstalks. |
| 95-100\% | 97.5 |  |  | The rangeland appears to be completely utilized. More than $50 \%$ of the undesirable herbaceous plants appear to have been completely utilized. The remaining stubble is grazed to the soil surface. |
| Totals |  |  |  |  |

## 5B. Shrub Cover Estimates (35 pts)

Shrub cover by line intercept.
Examine the transect line placed on the site, record segments of shrub canopy that intercept the transect, and

| 5 | 11 | 17 |  |
| :---: | :---: | :---: | :---: |
| 6 | 12 | 18 |  |
| Subtotal $=$ | Subtotal = | Subtotal = |  |
| Total Intercept $=$ |  |  |  |
| \% Cover = |  |  |  | calculate percent cover. (30 pts total; yard sticks will be provided)

| Shrub Cover Intercept | \| Transect Length =__ft |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Plant <br> Intercept | Intercept <br> (inches) | Plant <br> Intercept | Intercept <br> (inches) | Plant <br> Intercept | Intercept <br> (inches) |
| 1 |  | 7 |  | 13 |  |
| 2 |  | 8 |  | 14 |  |
| 3 |  | 9 |  | 15 |  |
| 4 |  | 10 |  | 16 |  |

$\qquad$

Correct Calculation Process $=20$ pts
Appropriate Estimate (within $\pm 5 \%=15$ pts;
within $\pm 10 \%=10$ pts) $=$ $\qquad$
