#### **Team Activity (330 points)**

Teams will conduct research using local veterinarians and veterinary resources based on the annual topic posted on the National CDE webpage in November. The team will be provided a specific scenario from the Sate CDE Superintendent at state CDE's. Students will prepare their presentation and be ready to present.

Teams will have 15 min to prepare a presentation that will include diagnostics and recommendations as well as explain steps and procedures for the veterinary process in their plan. Teams need to determine what aspects of veterinary medicine and roles are most important to demonstrate based on the annual topic.

The team will be required to give an oral presentation for a maximum of 15 minutes explaining decisions made by the team. All team members are expected to participate in the presentation. The team will then be required to answer questions from judges regarding the decisions reached by their team.
